MAKING WATER TREATMENT INVISIBLE™

Commercial & Industrial Water Assurance Program

MAKING WATER TREATMENT INVISIBLE™

How We Make Water Treatment Invisible

The key to making water treatment invisible for our customers is focus. Our entire process revolves around our focus on providing systems that meet your water treatment needs consistently, reliably, and invisibly thanks to our proactive, routine maintenance.

Mar Cor Purification designed the WaterSmart program to streamline the commercial/industrial water procurement process and give the end user the high purity water they need at a low monthly price without the worry of a large capital investment and reoccurring maintenance cost. The WaterSmart program provides all equipment, spare parts, consumables, and service required to keep the system producing water for your operation for a fixed period with simple monthly payments.*

What Makes WaterSmart the Right Choice?

- **Worry Free** - Predictable, fixed monthly water expenses for a pre-determined period.
- **No Capital Investment** - Mar Cor Purification includes the cost of the system components, maintenance, and labor.*
- **Maximized System Uptime** - Routine scheduled maintenance ensures a consistent quality and quantity of water while minimizing downtime.
- **Saves Time vs. Purchasing** - Eliminates ramp up time associated with learning system technology and required preventative maintenance.
- **Easy & Dependable** - We work with our team of experts to configure, install and maintain your system on site, while you concentrate on your business.

Typical Applications

- General Industry
- Chemical Formulations
- Power and Utilities
- Boiler Feed
- Pure Rinse Water
- Laboratory
- Microelectronics
