

Direct-Pure[®] adept

Produce Type I ultrapure water and RO water on demand from tap water directly

The small foot print Direct-Pure adept system is an ideal choice for users who need up to 20 liters of ultrapure water or RO water per day. Quality of ultrapure product water meets or exceeds ASTM, CLSI, CAP, and ISO Type I water standards.

Features

- The compact system provides an easy way to produce ultrapure water or RO water on demand from tap water directly with no additional pre-treatment filters.
- The system is equipped with a safeguard RephiDuo P Pack cartridge and a dual-column RephiDuo U Pack ultrapurification cartridge to ensure optimum quality of the final product water.
- No external storage tank is required, which eliminates the risk of water degradation by contaminants from the container or the tubing.
- The fully automatic controlled and maintained system contains automatic cleaning cycles and self-maintenance functions for the RO membrane, which increases the lifetime and efficiency of the RO membranes as well as the cartridges.
- Automatic hourly system recirculation in the loop prevents bacterial growth and maintains water purity at all times.
- System status and key quality parameters are clearly displayed on large LCD screen for easy system performance monitoring.

Main Applications

Ultrapure water can be used in many areas. Here are some typical applications.

- HPLC mobile phase preparation
- Preparation of reagent blank solutions
- As sample diluent for GC, HPLC, AA, ICP-MS and other analytical techniques
- Preparation of buffers and culture media for mammalian cell culture
- Preparation of molecular biology reagents, etc.
