

Therapy Supply Station

Unlike other station wall boxes, the Tx3 is:

- **Compliant** Meets the CDC recommended strategy of separate areas, with the introduction of a door compartment that separates the waste drain, minimizing the risk of cross-contamination.
- **Identifiable** Reduces staff confusion with clear labels and color-coded ports and valve handles, meeting AAMI and CMS standards.
- **Clean** Easy to keep clean with smooth surfaces, a removable face cover and sloped areas that also aid in complete fluid drainage.
- **Durable** Made of corrosion resistant materials for a dependable, long life.
- **Versatile** Accommodates a variety of water and port options, including high purity and standard water connections.
- **Adaptable** Fits current model cut-outs for easy retrofits.

Reimagined dialysis workstation that's clean and durable.

As the connection point providing hemodialysis machines with acid, bicarbonate concentrates and treated water, as well as where waste products are disposed, it's easy for the typical wall box to become contaminated with microorganisms. The Tx3 Therapy Supply Station from Mar Cor has set a new standard by separating the water and drain connections to better protect patients and staff from potential contamination.

All aspects of the Tx3 is focused on maintaining a clean and safe environment. Separate areas, as recommended by the CDC, help reduce the risk of patient infection and staff contamination. The smooth, durable surface and removable face cover is easy to wipe down. And staff will appreciate that the clear labels and color-coded ports and valve handles further help avoid confusion.

Tx3™ Therapy Supply Station Details

Materials of Construction:
ABS resin

Water Connection:
PEX, PFA, PVDF, and other standard connections

Concentrate Connector:
Fresenius or B.Braun

Drain Connection:
1-1/2" male socket

Mounting Kit:
Included with each station
(Stainless steel screws and washers)

Dimensions:

Height:	17.9" (19.3" with bezel)
Width:	17.3" (18.2" with bezel)
Depth:	5" (6" with bezel)
Weight:	3.5 lbs. (empty) 4.5 lbs. (with bezel)
Rough-in:	15" W x 15-3/4" H
Mounting face area:	1" minimum

Configuration Examples

CleanPEX™ Tubing Loops for Water

- Wall Box, Tx3, WP, FP, 2A, 1B, 25MM
- CWP water fitting (25MM PEX). Fresenius connectors, 2 acid and 1 bicarb (color coded). Shut-off valve per connector.

PFA Tubing Loops for Water

- Wall Box, Tx3, WT, FP, 2A, 1B, 0.75
- Water fitting (3/4" PFA). Fresenius connectors, 2 acid and 1 bicarb (color coded). Shut-off valve per connector.
