MAR COR CELEBRATES 50 YEARS OF EXCELLENCE

Fifty years ago, Mar Cor opened its doors as a small, regional water service company. Over the years, the company has grown to be a leader in water purification with a global reach and an extensive product and service offering. We have accomplished a lot.

In 1971, Mar Cor serviced water purification systems for a variety of industries. Building on that experience, Mar Cor continued to grow through the acquisition of several companies, including Minntech Filtration Technologies Group, Biolab Equipment, GE Medical Water, and Gambro's U.S. Medical Water business. Today, Mar Cor is trusted by Renal Healthcare Providers to deliver innovative products that enhance the quality of life for people affected by renal failure. The company develops 510(k) water treatment systems, bicarbonate and acid concentrate mixing and distribution systems, disinfectants and filters, and offers 24/7 service from 25 locations.

"It's amazing to think about how far we've come in the last 50 years, we have so much to celebrate," said Greg Reny, SVP and GM, Renal. He continued: "Mar Cor was started by a group of gutsy, dedicated and hard-working people that had a passion for public service and a passion for excellence and leadership in water purification. While the faces and the names on Team Mar Cor have changed over the years, the guiding values and principles of our founders have not. Also constant throughout has been our commitment and passion for delivering innovative products and services that meet the changing needs, challenges and complexities of the markets we serve. Going forward, I have every confidence that we will continue to earn the trust and loyalty of our employees, customers and partners."

Through the remainder of 2021, we will celebrate our 50th anniversary with Employees, Customers and Partners. Please join us in the festivities!
