

**PRODUCT BULLETIN #3234**

Date: June 6, 2022

From: Michael Verguldi, Sr. Product Manager - Medical

Subject: **Notification of End of Life for 4400M RO System**

Effectivity: End of Sales: 15 November 2022  
End of Shipment: 31 December 2022  
End of Support/Service: 31 December 2029

Mar Cor® brand products and services, including our 4400M Reverse Osmosis (RO) System originally introduced in 2004 by Mar Cor Purification, Inc, are now part of Evoqua Water Technologies' family of offerings. Since the introduction of the 4400M system we have been dedicated to releasing many new RO devices designed to improve provider productivity and increase the standard of care when treating potable water required for hemodialysis therapies.

Accordingly, Evoqua is providing notification of our intention to discontinue the 4400M RO model. The entire family of 4400M RO devices will no longer be offered for sale as of December 31, 2022. The last day to place an order for this device is November 15, 2022. No orders will be processed after that date:

Evoqua will continue to provide technical support, field service, and spare parts through December 31, 2029. After the End of Shipment, Evoqua will not update, modify, or do any other type of improvements on these devices unless dictated by safety concerns. Evoqua reserves the right to discontinue product support at any time if manufacturing or product availability has been compromised.

Evoqua offers a wide variety of alternative water treatment systems using RO technology specifically for the hemodialysis market. Please direct all questions to your local sales representative or to [info@mcpur.com](mailto:info@mcpur.com).
