

PRODUCT BULLETIN #3236

Date: August 22, 2022

From: Michael Verguldi, Sr. Product Manager

Subject: **Notification of End of Life for the WRO 300 Water Purification Unit**

Effectivity: End of Sales: 31 December 2022
End of Shipment: 31 January 2023
End of Support/Service: 31 January 2030

Mar Cor® Water Purification Systems and Services, including our WRO 300 Water Purification Unit originally introduced by GAMBRO Renal Products, Inc. in 2010 into the United States later available through Mar Cor Purification Inc., are now part of Evoqua Water Technologies' product offerings. Since the introduction of the WRO 300 Water Purification Unit, we have been dedicated to releasing many new Reverse Osmosis (RO) devices designed to improve provider productivity and increase the standard of care when treating potable water required for acute and/or home care hemodialysis therapy applications.

Accordingly, Evoqua is providing notification of our intention to discontinue the WRO 300 Water Purification Unit. The WRO 300 Water Purification Unit will no longer be offered for sale as of January 31, 2023. The last day to place an order for this portable RO unit is December 31, 2022. No orders will be processed after that date. This doesn't impact the availability of the WRO 300 H Water Purification Unit. The WRO 300 H will remain available until further notification.

Evoqua will continue to provide technical support and spare parts for the WRO 300 through January 31, 2030. After the End of Shipment, Evoqua will not update, modify, or do any other type of improvements on this device unless dictated by safety concerns. Evoqua reserves the right to discontinue product support at any time if manufacturing or product availability has been compromised.

Evoqua offers a wide variety of alternative portable water purification units using RO technology specifically for hemodialysis applications markets inside and outside the United States. Please direct all questions to your local sales representative or to info@mcpur.com.
