

PRODUCT BULLETIN #3251

Date: October 22, 2024

From: Michael Verguldi, Sr. Product Manager

Subject: Discontinuation of SteriChek Chlorine Test Kits

Effectivity: Immediately

Per the manufacturer of the SteriChek line of test kits and strips, the total chlorine test kit and refill kit are no longer available. Production for this line of chlorine test kits has been discontinued. As a result, we are providing notification of our inability to continue offering these two kits. We are no longer able to purchase either of these kits and our inventory has been depleted.

However, we are pleased to offer a suitable replacement total chlorine test kit from a proven and reliable test strip manufacturer especially designed for use for dialysis clinics. These test strips carry a U.S. FDA clearance. This test kit is already part of our product line. See below for the impacted test kits and for the equivalent replacement part number(s):

Discontinued Part Number	Prior Part Number	Description	Replacement Part Number	Prior Part Number
W2T915788	WT811902	Test Kit, Total Chlorine, DPD, 1/Bag/100 pillows, 2 Tube, 1 Compare Wheel	W2T915707	WT5167
W2T915786	WT811903	Test Kit Refill, Total Chlorine, DPD, 5 Bag/100 pillows	W2T915707	WT5167

We offer a complete line of high quality and reliable test kits and test strips commonly used in the hemodialysis market as well as for water treatment systems. Please direct all questions to your local renal sales representative or go to www.mcpr.com for more information.
