

PRODUCT BULLETIN #3255

Date: November 4, 2025

From: Julie Sencak, Aftermarket Portfolio Manager

Subject: **Notification of End of Life for the Renatron® Reprocessing System**

Effectivity: End of Renatron System Sales: Until existing inventory is depleted
 End of Support/Service/Spare Parts: 31 December 2028

The Mar Cor® brand of water purification systems and services, including our Renatron dialyzer reprocessing system introduced in 1982 by Minntech, are now part of the Evoqua Water Technologies family of offerings since 2022. For decades, Renatron made hemodialysis more affordable by offering a system that safely and reliably cleaned and sterilized dialyzers, enabling their reuse for multiple treatments.

This notification communicates our intention to discontinue the Renatron system and its spare parts. Effective as of the date of this communication, we will not update, modify, or do any other type of improvements on these devices. We will continue to sell the remaining stock of Renatron systems and spare parts under our standard terms as current inventory allows, or until December 31, 2028. The following part numbers have remaining inventory in limited quantities:

Part Number	Prior Part Number	Description	Quantity Remaining
W3T555743	78398-007	Renatron II (110V)	7
W3T555753	78399-446	Renatron II (230V)	6
W3T555754	78399-448	Renatron PA (230V)	0

Technical support for the Renatron system or spare parts will no longer be available after December 31, 2028. Additionally, we reserve the right to discontinue product support at any time if manufacturing or product availability is compromised.

Please direct all questions to your product manager or to orders.marcor@xylem.com.
